# Learning Targets

## Number Sense and Numeration: Place Value

- ✓ We are learning to compose and decompose two-digit numbers in a variety of ways, using concrete materials (i.e., place 42 counters on ten frames to show 4 tens and 2 ones and compose 37¢ using one quarter, one dime and two pennies)
- ✓ We are learning to use concrete materials, the ten that is nearest to a given two-digit number, and justify the answer (i.e., use counters on ten frames to determine that 47 is closer to 50 than to 40)
