

Problem Solving Checklist

THINK: I read the question two times, and underlined the important information. I carefully thought about what the question was asking me to do before I started.

PLAN: I used a strategy, or two that helped me solve the problem. I chose manipulatives to help me solve the problem

DO: I carried out my plan remembering to show all ALL of my work (I used numbers, words, tables and/or pictures)

REFLECT: I have checked that my answer is correct. I have shown how I know this. I have changed my plan if it didn't work.

COMMUNICATE: I answered the question in a complete sentence using math language. I proved that my answer is right!

"I know my answer is correct because ..."
